

PRAMAN COMPLIANCE REPORT (TEXT-ONLY RENDERING)

probe, so this report carries no charts, colour or typography. Every figure below is the same figure the full renderer would print. Install ReportLab to restore the graphical report.

DEVICE IDENTITY

```
Device ID: d
Hostname: h
Vendor: cisco_ios
OS family: ios
OS version: not present in the supplied input -- upload 'show version' and 'show inventory'
output alongside the configuration to populate this
Hardware: not present in the supplied input -- upload 'show version' and 'show inventory'
output alongside the configuration to populate this
Serial numbers: not present in the supplied input -- upload 'show version' and 'show
inventory' output alongside the configuration to populate this
Configuration SHA-256:
Audit ID: a
Audited at: 2026-01-01T00:00:00Z
Ledger sequence: 1
```

COMPLIANCE POSTURE

Score: 0.0%
Basis: score = pass / (pass + fail) over automated checks; notchecked, notapplicable and unknown are excluded from the ratio
Counts: 0 pass, 1 fail of 1 scored; 1 controls evaluated
fail: 1

BY FRAMEWORK

CIS: 0 pass, 1 fail

FAILURES BY SEVERITY

high: 1

FINDINGS

```
1.1.1 t
FAIL / high severity / CIS CIS Cisco IOS 15 v4.1.1
r
NOTE: Publisher's stated impact: Implementing Cisco AAA is significantly disruptive as
former access methods are
immediately disabled. Therefore, before implementing Cisco AAA, the organization should
carefully review and plan their authentication criteria (logins & passwords, challenges &
responses, and token technologies), authorization methods, and accounting requirements.
